115

workers are very low with only 215. Other workers shares about 6159 population out of 5064 were male. Marginal workers are also above the 1000. Non working population shares 17010.

**Table 1.3 working population of kalamb town**

| Category             | Total  | Male  | Female |
|----------------------|--------|-------|--------|
| Main Workers         | 7,690  | 6,112 | 1,578  |
| Cultivators          | 583    | 479   | 104    |
| Agriculture Labourer | 733    | 438   | 295    |
| Household Industries | 215    | 131   | 84     |
| Other Workers        | 6,159  | 5,064 | 1,095  |
| Marginal Workers     | 1,013  | 455   | 558    |
| Non Working          | 17,010 | 6,957 | 10,053 |

### Conclusion

The present paper deals with population composition of kalamb town. Town population is very low as compare to other city but in comparison to Osmanabad district ranked 4<sup>th</sup> position in terms of taluka place. The population growth is observed after every census year except 1961. The sex ratio is also less than average sex ratio of India. Household industry workers are very less. Town is a rare city with having population of scheduled tribe compare to other cities. Because most of the pardhi community lives here.
